

DistriVIEW

Create video management systems for your surgical and medical environments

The right information, at the right place and the right moment.

With the SurgiMedia DistriView solution, we **build together the video management system** of your operating rooms to create a **user-friendly and efficient** working environment.

Versatile and customizable

We customize the number, the size and the position of the screens (fixed or built-in), the number and the position of the audio and video inputs and outputs ...

Upgradable

Because your actual needs may not be the same as your future ones, our SurgiMedia solutions are designed to be evolutionary and adaptive in order to guarantee longevity for your surgical rooms.

All of your audio, video, DICOM sources at your disposal

You can access your patient's file and handle video display from the control panel to broadcast on one or several wall or surgical screens, the right information in the right place at the right moment.

Latest or traditional technologies

The SurgiMedia DistriView uses SDI and IP technology to meet each O.R. and specialty specific needs, budget and wishes.

Made in France

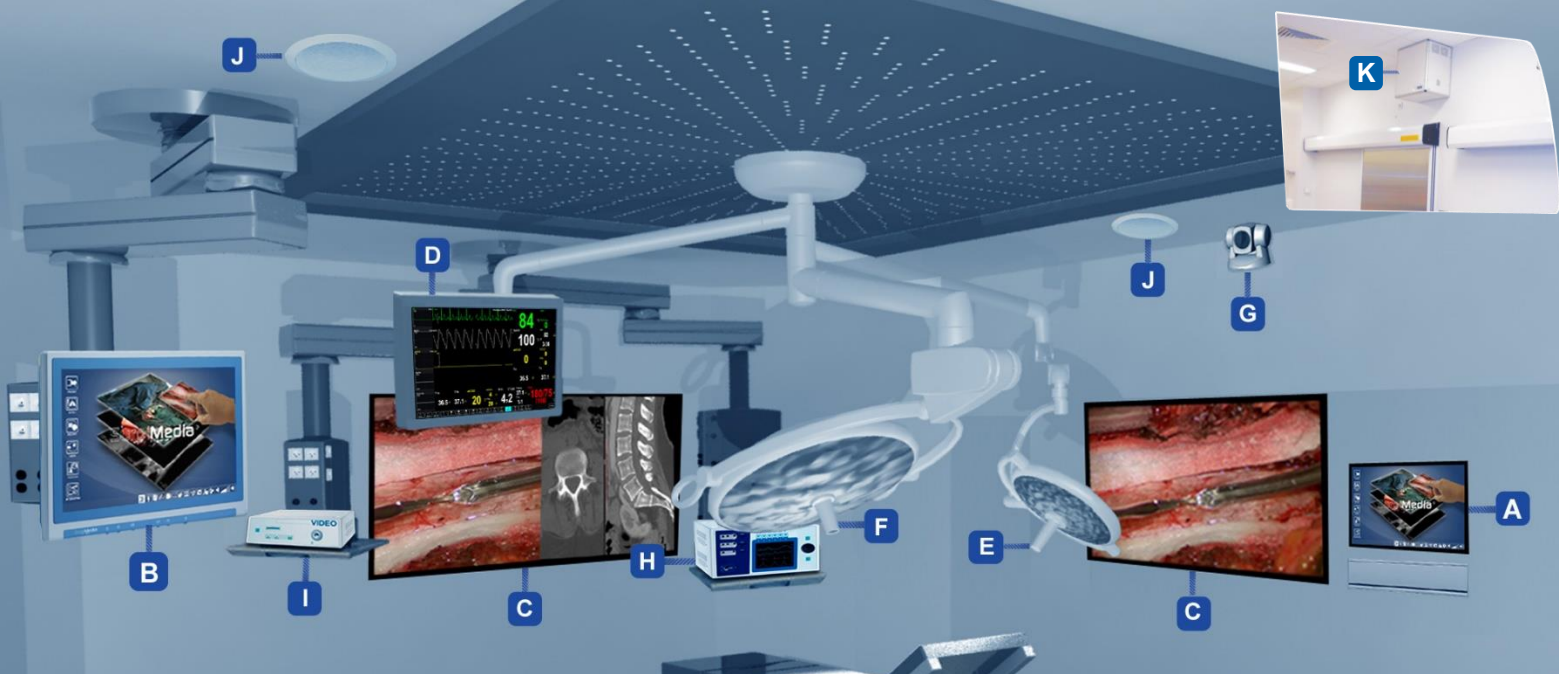

We design and produce our solutions in **Grenoble**. Which mean we master them perfectly and so we can adapt them to the specific demands of our customers.

Warranty

SurgiMedia DistriVIEW solution, and the rest of our products are **2 years-warranted**.

Medical Devices

SurgiMedia DistriVIEW are CE marked in order to address **security and hygiene expectancies** of your **medical environment** and ensure their compatibility with other equipment which they are connected to.

“Integrated OR” Configuration

- A. TOUCH-CONTROL STATION (WALL-MOUNTED)
- B. TOUCH-CONTROL STATION (ON SPRING-ARM)
- C. INTEGRATED WALL MONITOR
- D. MONITOR ON SPRING-ARM (PIP/PAP DISPLAY)
- E. SURGICAL LIGHTS CONTROL

- F. OPERATING FIELD CAMERA CONTROL
- G. AMBIENCE PTZ CAMERA CONTROL
- H. COMPUTER SOURCES CONNECTION
- I. VIDEO SOURCES CONNECTION
- J. AUDIO CONTROL WITH CEILING LOUD-SPEAKERS
- K. REMOTE COMPACT RACK (CORRIDOR/TECHNICAL ROOM)

Patient's file

Simplified access to the patient's file through the **DICOM Work List**. Compatible with **Hospital Information Systems with HL7 protocol**.

- **Import patient's data** (reports, radiology images...) from PACS through the network

Real-time multi-display capability

Distribute, display and visualize your video sources **on several screens**. Benefit from **high quality audio system** in the room.

Photos and videos

Record your surgical procedures in **full HD and 4K**, sequence-formats easy to interpret and edit. Record them **automatically on the local server** or the network.

Storage

Manual or automatized record of your photos and videos at **DICOM format**, directly on the **PACS**.

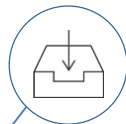

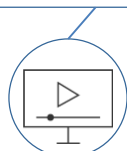

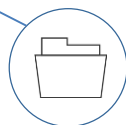

Intuitive and touch interface

User-friendly, the SurgiMedia DistriVIEW solution is equipped with **touch screens** and easy to use **icons**.

Share

Share data with remote surgeons and medical staff through the network.

- HD and 4K **video-conferencing**
- Bidirectional **audio streaming**

Your needs, our solutions

PRODUCT	DESCRIPTION	REFERENCE
DistriVIEW SDI	SurgiMedia for integrated rooms based on a matrix switch SDI technology made for routing, recording, displaying and streaming of SDI sources up to 3G-SDI (Full HD). Coaxial cabling.	Réf. IS2241
