

SurgiMedia[®]

Autonomes

Your all-in-one video management solution without structural modifications.

SurgiMedia® Autonomes

Developed to answer the surgeons needs in terms of efficiency, versatility and flexibility, the SurgiMedia Autonomes line allows to access instantly to the patient's file to **import, store, archive and share** the audio and video records made in the operating room.

PLUG-AND-PLAY

The touchscreen for display and monitoring, the connections, the audio and video software, **everything is centralized on a single machine**. Connect it and **start right away** !

SECURISED

Make our machines **invulnerable to hackers, virus and data losses** is our top priority at Isis. Our development team has elaborated a **locked and risk-free** mode for the institution network. However, a **half-locked mode is available** for the IT department willing to handle this feature.

100% COMPATIBLE

Our machines are **designed to allow the connection to all numerical medical devices** (ultrasonic scanners, endoscopes, browsers, microscopes, image intensifier...) used by the surgeons, **whatever the trademark** !

ERGONOMIC

SurgiMedia users take full advantage of a **quick start** and an **intuitive interface**. Adjusted to the surgeons daily work, the machine allows the access to **basic needs in just one click** from **the icons on the touchscreen**.

EVOLUTIVE

Software updates, technological improvements, connecting plot increase, **expansion of video or audio options** : at ISIS, our products are conceived with a **modularity logic**, allowing the evolution of your machines through time, without structural modification and at a **reasonable cost**.

ONE line, TWO star products

In order to answer users needs, ISIS developed two products :
SurgiMedia COMPACT and **SurgiMedia XL**.

SurgiMedia® COMPACT

With a **competitive price**, this machine is adaptive to all of the specialties in the operating room. Thanks to its compact size, you will be able to **move them from an operating room** to another in mobile setting and **store them easily even** in a limited space.

Available in **Full HD** or in **4K**, only one input can be recorded at the same time. It is possible to **add other** inputs for display purpose by completing the COMPACT line with a **SelectBOX**.

SurgiMedia® XL

Sharing the **mobility** of the COMPACT line, the SurgiMedia XL displays the image on a **wider screen** for a better **visual commodity**.

Originally equipped with a **video setting similar** to the COMPACT, this machine is **multi-source** (several inputs/outputs at the same time to display and record) and allows an **adjusted evolution** on demand. **Four versions** of this product with **growing functionalities** exists.

Made in France

We **design and produce our solutions in Grenoble**. Which mean we master them perfectly and so **we can adapt them to the specific demands** of our customers.

Warranty

SurgiMedia COMPACT and XL and the rest of our products are **2 years-warranted**.

Médical Devices

SurgiMedia COMPACT and XL are CE marked in order to address **security and hygiene expectancies** of your **medical environment** and ensure their compatibility with other equipment which they are connected to.

TWO products to answer ALL of your needs

SurgiMedia® COMPACT

SurgiMedia® XL*

Display and recording of photos and videos in full HD and 4K

Simplified access to the patient's file through the DICOM Work List. Compatible with HL7

Manual or automatized record of your photos and videos at DICOM format, directly on the PACS.

Sources compatibility (SDI, HDMI, CV, YC, VGA, SV)

Share surgical procedures Streaming / Video-conferencing

DUAL PIP/PAP display of two combined video sources

Junction of several devices simultaneously (1 to 6 sources)

Real-time display of various video sources on several screens simultaneously (1 to 3)

* The set of options vary based on the selected SurgiMedia XL version. Please refer to the SurgiMedia XL product description.

Do you have a project in mind ?

Building **adaptive and custom-made** solutions is part of our DNA, just like the **counseling and support** during each of your project steps. Let's discuss it !
